

# Wired

## “ALMOST TOO EASY”

1-channel passive video, audio and power transceiver (AV-113)

1-channel passive video transceiver (AV-12)

### Smart Installers do not use COAX, they use CAT5E or CAT6

### Why?

Easy installation of camera  
+ 1/3rd of the cost when using CAT5e or CAT6 cable  
+ Migration to IP camera made easy

The next big thing in the security industry is here, a video balun allows users to transmit audio, video and power over long distances using only one CAT5 cable, which means lower cable costs and a standardised cable structure.

Our product line includes 1 - to 16 - channel passive and active baluns. Find out how you can benefit from our ability to supply leading edge products. Contact us today.
