

## HDMI Hand Held Tester

World's first HDMI 1.4 cable  
continuity tester

### Why you need it:

- Installers need to test long HDMI cables before and after pulling them thru the walls
- It's even more important after terminating the DIY HDMI cables in the field

### Features and benefits:

- World's first HDMI hand held cable continuity tester with full HDMI 1.4 support including HDMI Ethernet and Return Audio
- Measuring the continuity of all 14 HDMI wires including the Ethernet and Return Audio wires in one quick step and display all status via 9 LEDs
- Separated transmitter and receiver design for testing the long cables installed in wall between rooms
- Can test both regular HDMI cables with Type A connectors and mini HDMI cables with Type C (or Type A) connectors
- Rugged plastic enclosures with rubber jackets for durability
- Powered by two long lasting and easy to find AA batteries

Products name	Model number	Part number	Availability
HDMI hand held tester	HHT-100	75-001-01	End of Q1, 2011
