

PRODUCT BULLETIN

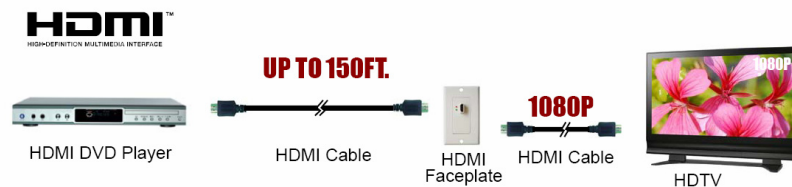

June Product News from Wired Limited

ITEM NO.: WIR - IP01

WIR - IP01 extenders are designed to extend any TCP/IP devices for long range transmission up to 200mtrs over existing coaxial cable. They are completely transparent to protocols, codes, and applications ensuring compatibility with any IP device or camera and its management software. It is perfect solution for sending IP video links to remote camera installation that are beyond the 100 meters distance limit of Ethernet. Also utilizing the CCTV / TV cabling infrastructure to transport IP protocol, thus saving on installation of cat cable.

Item NO.: WIR-HDMIWP (Wallplates)

WIR-HDMIWP extenders are designed to transport the Version 1.3 HDMI over 2 cat5e/cat 6 cables. The cable is either UTP or STP. Distance for 1080P is > 35 mtrs and longer distance on lower Res settings. This device is in two parts a transmitter wall plate and a receiver wall plate; these have a micro chip within that boosts the signal (passes signal) the specified lengths. This product is not backward compatible with all versions of HDMI. A fantastic product that does not require a power pack! A free tool with every pair purchased!

Item NO.: Mode conditioning Leads

Due to demand we have decided to stock Mode Conditioning leads, we have at any one time at least 30 in stock, these are a mix of 2 and 3 mtr leads. Common interface types being SC, LC, and ST also.

Stereo Audio and Hi Res + IR + Control RS232 300mtrs and dual screen

The XTPRO, this is manufactured by Smart Avi in the states, it caters for resolutions upto 1900 x 1200 at distances to 300 mtrs over UTP cat5e /Cat 6.

A true market leader as supports Dual screens at remote and 232 (control) and IR !! What more could you ask for?

- Facts - Wired sells over 500-000 labels to date to NZ and Australia cabling market sector.
- Facts - We have made over 1.3 million cables over the last 4.5 years
