NEW Cabling Snake

Features of the NEW Cabling Snake from Wired.

Part # CSNAKE3.6

- ✓ Can be used in ceilings, under floors, steel stud walls and timber walls.
- ✓ They can be used in all types of cabling disciplines i.e. Industrial, Commercial and Domestic.
- ✓ They are 3.6 metres long, 15mm wide and 4.5 mm thick.
- ✓ Made of polypropylene and are particularly strong and durable.
- ✓ Can be used by all installers of cables i.e. Electricians, Data and Telephone, Fire and Security Alarms, TV and Audio and probably other applications I haven't thought of.
- ✓ Can be bent and shaped to suit all applications and then re-straightened
- ✓ Can be cut with side cutters and easily redrilled for attaching cables if required.
- ✓ They can be stored in the roof rack tubing as seen on most contracting vehicles or coiled inside their vehicles.
- ✓ Particularly useful for accessing walls which have fibre glass batts or sound batts ie commercial sites.
- ✓ Ideal for all domestic applications, i.e. installing additional sockets, lights etc, data / telephones TV, Audio and complete rewires.
- ✓ Ideal for installing cables in conduits / pipes etc, particularly flexible conduit.

And finally they are a great time saver, very cost effective and would pay for themselves in the space of a couple of hours and of course are easily replaced.
